EDUCATION

MIMIT
B.Tech in Computer Science & Engineering
Expected May 2026 | PB, India
Malout Institute of Management and Information Technology

LINKS

GitHub: github.com/alpha045
Portfolio: vikash16.netlify.app

SKILLS

Programming Languages
JavaScript (ES6+), Python, C++, Dart, SQL

Frontend Technologies
React.js, HTML5, CSS3, Tailwind CSS, Responsive Design Layouts

Backend & Databases
Node.js, Express.js, REST APIs, MongoDB, Firebase

Tools & Concepts
Git, GitHub, Postman, Linux CLI, CRUD Workflows, Async/Await, Token Authentication, JWT, API Integration

COURSEWORK

Data Structures & Algorithms
Database Management Systems
Operating Systems
Object-Oriented Programming
Software Engineering

ACHIEVEMENTS

- Cleared the SAFE Hackathon organized jointly by Punjab National Bank (PNB) and PTU.
- Developed an Android safety utility application to spread awareness about modern financial fraud vectors.
- Actively demonstrated engineering builds at Prayog 2025.

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate and aspiring MERN Stack Developer with comprehensive hands-on experience building scalable, full-stack web applications. Skilled in dynamic backend REST API design, complex state management, secure database architectures, and cross-platform mobile software development pipelines.

EXPERIENCE

Apna Time Tech Solutions | Full Stack Trainee
Jan 2026 – June 2026 | 8th Sem Training

- Engaged in immersive industry production environments focusing on robust MERN stack application design patterns and cloud component integration.
- Collaborated closely within team sprint structures to write high-quality, scalable code, develop clean routing endpoints, and implement user security protocols.

Azure Skynet Solutions | Python Intern
June 2024 – July 2024 | Remote

- Engineered programmatic automation scripts utilizing foundational object-oriented core blocks during localized software workflows.
- Gained strong real-world problem-solving insights and technical experience regarding script execution validation metrics.

Udemy Platform | Mobile App Development
Jan 2025 – Oct 2025 | Self-Paced

- Completed a professional framework specialization covering state management, cross-compilation maps, and deployment setups.
- Built and deployed functional, multi-screen responsive interfaces using the Flutter development engine and the Dart runtime structure.

PROJECTS & RESEARCH

Smart Kirana Store | MERN Stack Ecosystem
2025 | Code Repo

- Designed a commercial store ledger management tool featuring digital khata, inventory adjustments, instant billing calculators, and custom daily sales reporting analytics.
- Structured asynchronous MongoDB pipelines via Express services ensuring optimal front-to-back response latency metrics.

CivicEye Platform | Full-Stack Application
2024 | Code Repo

- Programmed a localized public utility tracking system allowing community mapping, secure complaints processing, and complaint statuses.
- Embedded JWT authentication pipelines and persistent complex data models allowing efficient operations handling.

HRGA AI Architecture | Published Research
2024 | AI Research Build | Live Demo

- Co-authored research outlining a modular AI system engine designed to improve conceptual reasoning, runtime memory bounds, and swift user execution privacy protection.

Personal Portfolio Platform | React & Tailwind CSS
2024 | Code Repo | Live Demo

- Designed a responsive layout system integrating React states to showcase current project portfolios, custom skills, and active contact structures.
